SUMMARY

Full Stack Web Developer with a background in International Relations. Dedicated to learning and constant development of skills. Known among colleagues for hard work, clear communication and leadership skills

WORK EXPERIENCE

Refurbishing Team Lead

Estarland

2020-2021

Responsible for setting up short and long term goals for our department to achieve. Took charge of training new team members. Evaluated team members in order to best distribute work. Created an environment of clear and direct communication to optimise workflow and prevent mistakes.

Key Accomplishments:

- Efficiently managed a team of six
- Reached long term goal of reducing overstock items by 50%

PROJECTS

Pokedex Tracker | <https://github.com/AJManzione/Pokemon-Trading-Center>
<https://pokemon-app.herokuapp.com/>

- This application is for fans of the video game Pokemon as it allows users to keep track of any and all pokemon they have caught throughout the various games.
- My core responsibilities for this application were to write the models, schemas, and authentication middleware used in our backend. I also worked on the authentication, and mutations in the front end of the app.
- Tools / languages used: ReactJS, JavaScript, Bootstrap, NodeJS, NPM, Express, GraphQL.

E-Commerce Backend | <https://github.com/mattjgatsby/E-commerce-back-end>

- This is a backend application meant for an e-commerce site. It is built with Object-Relational Mapping techniques, and a MySQL database utilising Sequelize.
- I was fully responsible for putting together this application
- Tools / languages used: JavaScript, Express.JS, Dotenv, MySQL, Sequelize

Team Profile Generator | <https://github.com/mattjgatsby/team-profile-gen>

- This is a command line application built in Node.JS that takes in information about an employee and generates a HTML webpage that displays summaries for each person.
- I was fully responsible for building this application
- Tools / languages used: Node.JS, Inquirer, Jest, Bootstrap, JavaScript, CSS

Sounds Like All Over the World | <https://github.com/mattjgatsby/artist-event-and-rec>
<https://mattjgatsby.github.io/artist-event-and-rec/>

- This application allows users to search their favourite artist and find any upcoming live shows they're performing.
- My responsibilities for this application were to write functions that fetched data from third party APIs, logic for setting local storage, and logic to display modals to the user.
- Tools / languages used: JavaScript, CSS, HTML, Bulma, Parsley.JS, JQuery
